

The Definitive Mk II Parts Catalogue

First Edition Price £5

Including
S-Type
& V8 Daimler

Welcome to the SNG Barratt Jaguar MK2 Parts Catalogue

Following the Worldwide success of our Definitive Jaguar Owners Catalogue which covers over 20 classic models in one 300 page publication we have taken the decision to release a range of more detailed catalogues for each of the more popular models that we cover. This will allow us to better illustrate the parts we have available and to make identification of the item required a little easier.

How to use this catalogue...

Use the illustration in each section to identify the component that you require. Note the indicated item number and find the corresponding number in the section listing. There you will see our part number for that item, the description and to it's right the quantity required per car. Very often this will be the original Jaguar part number, thus allowing you to refer to an original factory parts catalogue if more detail is required.

Each part number is listed in our price list. This listed price is per item and is plus VAT (or BTW or Mwst where applicable), except in the case of books and other VAT exempt items.

If you then quote this part number when contacting our sales department, we will be able to confirm the cost and whether we have the part in stock.

If you cannot conclusively identify the item that you require then please call and we will to assist you. Our staff have many years of experience with all aspects of the Jaguar marque and may have just the answer...

Your customer number

Upon dealing with SNG Barratt for the first time you will be allocated a customer number. In most cases this will be your UK postcode or in the USA your telephone number. However if you are outside the UK/USA your sales advisor will use either your postal area code or a number devised using your surname. This customer number can either be found on your invoice or simply by asking the person serving you. The ability to provide your customer number when contacting our sales department will allow us to access your information far faster and serve you even more efficiently.

Customer number.....

Your vehicle details

Please complete this section as accurate vehicle information at your finger tips will prove to be invaluable. Very often identifying the correct part for your car can be all down to chassis or engine number. These details can best be found on the car itself, as registration documents can often prove to be incorrect due to engine swaps and vehicle upgrades that the DVLA have not been advised of. Please refer to the Vehicle Identification section on page 2 if you wish to cross reference any information.

Year of manufacture.....

Chassis number.....

Engine 2.4 / 3.4 / 3.8

(For ring gear only add suffix RG)

Performance Aluminium Flywheels

Manufactured to the very highest specification our performance aluminium flywheels give a fabulous increase in performance when fitted to either a standard or high performance Jaguar engine. At the same time they offer the benefits of longer engine life due to the reduced stress exerted on the crankshaft and bearings. This is because of the better moment of inertia characteristics that is possible through the use of aluminium instead of the standard steel as well as the obvious gains in horsepower.

13. Spin-on oil filter conversion kit

Your engine benefits from the improved oil filtration that modern filters offer and it makes oil changes far easier too!

Early* OFK16 1

Late* OFK18 1

* Engine number required to identify correct kit for your car.

14. Oil cooler conversion with spin-on oil filter

Cooler oil retains its viscosity under heavy load providing improved lubrication, reducing friction and wear. Perfect for fast road and track day applications.

JAGUAR for 1960
continue all their world-famous saloon and sports models and introduce a brilliant new series

THE NEW 2.4, 3.4 & 3.8 LITRE MODELS
The outstanding features of these new models are their power, speed, and the fact that they are the most powerful and fastest of the new series. The 2.4 litre model is the most powerful of the new series, and the 3.4 and 3.8 litre models are the most powerful of the new series. The 2.4 litre model is the most powerful of the new series, and the 3.4 and 3.8 litre models are the most powerful of the new series.

THE MARK IS SALOON
The new Mark 2 is the most powerful and fastest of the new series. It is the most powerful and fastest of the new series, and the 3.4 and 3.8 litre models are the most powerful of the new series.

THE DAVID BROOKS SERIES
The new David Brooks series is the most powerful and fastest of the new series. It is the most powerful and fastest of the new series, and the 3.4 and 3.8 litre models are the most powerful of the new series.

-----------------	--------	---

SNG Barratt have been selling Dayton Wire Wheels which are made by skilled craftsmen in the USA for several years now. In that time we have found that our customers are not only thrilled by their price, but also by the quality of their construction too! If you're thinking of fitting chrome wire wheels to your Jaguar or replacing a set that have seen better days, take a look at this list of Dayton features before you decide which wheels to buy!

a) Stainless steel spokes which cannot rust and have twice the fatigue resistance of chrome-plated spokes.

b) Swaged spokes, which are thicker at the hub and tapered to the rim. The swaging process gives the spoke a smooth, brilliant finish, provides more even distribution of stress, and allows the use of more spokes for added strength.

c) Four-layer nickel-chrome plating for greater durability and corrosion resistance.

d) Custom designs with the bolt circle and center locating hole precisely machined to each vehicle's original wheel specification for smooth running.

e) Expert polishing of all parts. Rims are polished on both front and back sides.

f) Fully tested designs to the Society of Automotive Engineers' specification J328 for fatigue resistance.

g) Each wheel is hand-tightened and gauged for concentricity. Spokes are pre-loaded with even tension for durability and precise wheel alignment. Periodic retreating and retightening are not required.

h) Three year comprehensive manufacturer's warranty.

1. Wire wheel	15x5J	15x6J	16x6J	16x7J
Curly hub to '67	D455	JB156	JB166	-
Flat hub '67 on	D472	EB156	EB157	EB167

Centre laced - JW156 - -

Jaguar elegance: The beauty that's more than skin-deep

Import each energy, each motor, each final line of any Jaguar, and you find within it Jaguar elegance—a grace of styling that has been engineered from within the very heart of the automobile itself. Jaguar elegance is reflected in the racing motor cars. One, the new Jaguar MK4, is available either as an open sports car with interchangeable soft or hard top or a completely enclosed three-door coupe. For this luxury from the segment a woman's vehicle, there is the versatile Jaguar 3.8 Sedan. Part Jaguar from the word go, this car has been called "the only car that behaves like a sports car." Discover Jaguar elegance yourself. See and drive either of these fine Jaguars now at your local dealer's JAGUAR CARS INC., 71 East 75th Street, New York, NY 10021.

New JAGUAR 3.4 & 3.8 'S' models

Join the famous range of Mark 2, Mark Ten, & 'E' type models which continue unchanged

The latest development
of one of the world's
most successful cars

The new 'S' models make available
all the latest of Jaguar's developments,
the long list of refinements in
Jaguar design and engineering.

The style choice of high performance, high quality motoring, which the Jaguar range already provides, is now further amplified by the introduction of these new 3.4 and 3.8 'S' models. With impeccable body styling and spacious interior proportions, these cars are powered by the world famous Jaguar 3.8 engine of over 2.4 litres in 3.8 litre capacity. The many important features incorporated include:-

- 30 brand independent suspension providing maximum riding comfort under all conditions.
- Self adjusting Three Disk in all four wheels and self adjusting handbrake.
- Sixteen square inch disc brakes locking with over 4000 lb. per sq. inch compression.
- Steering wheel for driver and front passenger.
- An exceptionally large luggage load space on centrally mounted metal capacity of no less than 110 cubic feet.
- Two good tie-downs in each row with strong eye-bolts in each panel.
- Sports interior with genuine leather and big doors offering the highest degree of comfort.

See the Jaguar range including the new 'S' models on Stand 118 Earls Court

Electronic Ignition Conversion Kits

Buy on-line at www.sngbarratt.com

The constant changing of points and condensers on any Jaguar or Daimler is both inconvenient and time consuming. The later Jaguars all feature electronic ignition which comes with the obvious advantages of greater reliability, economy and maintenance free motoring. The kits we provide are all produced by leading manufacturers and are built to out last many of the cheaper kits that are available from many of our competitors! They are fairly easy to fit and require no further adjustment once they are in situ, so fit one and forget it!

Ignitor Electronic Ignition Kits

A solid-state electronic system... "never change points again!"

Test results show the Ignitor delivers twice the voltage to the spark plugs, increasing horsepower, fuel economy and plug life.

A 2:1 improvement over point type systems in current fall time for increased coil output.

System is designed for use with most point-type coils.

Rotating cobalt magnets, mounted on the distributor shaft, trigger an electronic switching module (Hall effect integrated circuit) ...no points to burn, pit and corrode ...no moving and rubbing parts to wear out.

Electronics are molded in epoxy, eliminating deterioration from dirt, oil, grease or moisture (better foul weather performance).

Fits entirely inside the distributor, no "black box" to clutter your engine compartment. Stable timing... no need for any further adjustments.

No complicated wiring makes installations easy.

18. Jacking ratchet

C27873 1

19. Timing chain adjuster tool

SBS1265 1

Adjusting the timing chains on any 6 cylinder Jaguar engine has always been, a tedious job. Now SNG Barratt can now provide you with a "budget priced" alternative to the tool that the garages and restorers use.

20. Wire wheel cleaning brush

SBS9200 1

21. Wooden spinner saver

SBS9306 1

Used to tighten or remove 2 eared spinners. Fits over the spinner allowing you to hit the saver instead of your spinners!

22. Extending spinner removal tool

AC1016 1

Allows you to remove two eared spinners using leverage rather than brute force and temper!

Storage pouch
